

I am an XM subscriber and I love the Live traffic and weather reports. I pay \$10/month for the XM service and it is worth every penny just for these two features alone. I do not want to wait 30 minutes for some music to play on the FM and AM stations before they tell me the traffic for streets I dont even drive on and weather for the city next door. XM has a real service and needs to stay! please reject NAB's petition 04-160
